RELEVANT EXPERIENCE

Software Engineering Immersive | General Assembly, USA | Remote | Jan 2022 – Apr 2022
Successfully completed 500+ hours of expert led instruction **General Assembly** and hands on learning of Software Engineering and CS fundamentals and the industry's most in demand technologies. Developed projects, including:
- Portfolio Site: Built with HTML, CSS and JS [GitHub Repository] [Deployed Link] This was my first project ever.
- Project Weather App using a 3rd Party API: Built with React.js –This is an app that will provide you accurate information about the current weather using your IP address to locate where you are. You can see weather alerts and search for the current weather in different cities. I proudly developed it by myself. [GitHub Repository] [Weather App]
- Project Planning App "GoalGetter": This app was created using for the backend MongoDB, Mongoose, Express [1 -GitHub Repository API], and for the front end we used React.js and ReactbootStrap. [2 -GitHub Repository-Client] [Deployed Link]
- Community Garden App, this was developed using front end React and ReactBootstrap and for the back-end Django, and SQL. [1 -GitHub Repository API], [2 -GitHub Repository-Client] [Deployed Link]
